### 1. USSR

- a. (1) Soviet policy must still remain on the defensive in the Satellite countries and has to follow the self-inflicted process of loosening policies which slipped from its centrol. This particularly applies to Hungary where Army and Security Service, the actual prope of the Soviet power, were most exposed. All other attempts having failed, extreme terrorism, carefully covered up by a complete information black-out, is now being employed to obtain that me. sure of still refused popular collaboration without which no political and economic administration is possible. The compremise concluded with Comulka in Poland also still has a vory weak basis and the future attitude of the population is a matter of great concern to both Comulka and the Soviets. Since the situation in the Satellite countries is still unclear and Moscov failed to come out with definite and basic decisions, the Soviets are now trying to catch up with the presently uncontrolled development by flexibly making concessions wherever on optumity offered as for example in Poland, but do not refrain from earloying even compromising methods, if this is in the interest of their empire and if the development became intelerable as, for example, in "unrary.
  - (2) Mighlighting Moscow's present Satellite policies are two supplementary reports on Stevilor's visit to Mast Borlin on 30 November which indicated that Shepilov reprimanded Tup hkin because of his attitude during the critical days of the Polish-Nung rian crisis and recommended that he assume more conciliatory tactics to ard all Hast Bloc ambassadors. He also sugrested that Ulbricht improve the reintions with Poland and urged that Tito be kept in the camp o' Sociplism. He termed the situation in the Enstern Bloc extremely grave and said that all "ossible efforts had to be rade to strengthen the Socialist camp. He added that the Soviet Union v- a dotermined to give all necessary economic aid even if economic aid to the countries in isia and the Arab World would have to be suspended temporarily. At a conference which was held at Shepilov's initia ive on 1 December, Puschkin followed this line before diplomatic representatives of the East Bloc countries in Fact Berlin, stating that the Soviet Union was not resentful, wanted to have the unpleasant chapter of the jest closed as soon as possible and was regard to do ever thing in its cover to tide the Socialist countries over the economic difficulties.
- b. Tith the development in the critical area of the Soviet cordon of Satellites still being fluid and no lasting solutions shoping ur, the Soviets have to resort to political improvinations and are not at present in a position to reformulate their back political line as became necessary after the events of the recent period and was rementedly amnounced in a number of rejorts.

the general line of the XX Party Congress vas no longer considered intangible but rould only be discussed after a further clarification of the situation and in this conjunction also mentioned that the expended plenary session of the Central Committee of the Communist Party of the Soviet Union which had been planned for December would be postponed indefinitely. Such a postponement is scarcely to be expected for the planned session of the Council for Nutual Economic Aid, since time is of importance in that field and the solution of

25X1 25X1

25X1

- 2 a

	morely factual problems is on the agenda.  the Soviet collective leadership was divided over what policies of the XX Party congress had to be revised. The Soviets are werried not only by the regressing emancipation and leasening tendencies in the Satellite countries but also by cortain symptoms in the Soviet Union such as the state of ferment of the youth, the alcofness of the intelligentain and a sensible dissatisfaction among regress.	25X1
c.	The problem of a reformulation of the basic political line is closely connected with the still unclear situation in the collective leadership.  "ost of the remorts indicate a closer go ting together of the various exponents and a temporary suspension of their differences and personal rivalries in the face of the crisis and the dangers with which the Soviet orbit is confronted.  An omilibrium prevailed between the various forces and tendencies in the Soviet collective leadership the scales could gradually tip toward a majority of the holotov proup. This fact of the still unsettled situation of the top-level Soviet leadership also is a determining factor for the more ofination of basic political decisions and their official announcement.	25X1
ð. [	in view of the critical situation the Soviet leadership became aware that a new foreign-policy diversion offensive is imperative. One of the first otens in that direction is the disarmament overture which  aims to barter a weakening of "estern "urope for the weakening of "oscor in the Satellite area. the collective leadership had not yet made	25X1 25X1
	up its mind on the direction and extent of this diversion action.  Any offensive military intentions in Europe as a sort of a "for-ord escare" cannot, however, at resent be seen in the military picture of the situation or be gathered from political reports. The measive accusations against the West which Moscow voiced in conjunction with Hungary primarily served internal loviet consumption and are designed to justify the Soviet attitude and methods in Hungary before the Soviet population and the population of the Satellite countries.

c. The agreement which Rumania concluded with the Soviet Union is less favorable than the agreement which the Poles concluded with the Soviets, since the volume of credits for goods is smaller and the deadline for debts which had to be refunded during the period from 1955 to 1959 was only restponed. This Poland was premised a bileteral agreement of the presence of Soviet troops, Bucharest was only promised non-commital consultative contacts. In contrast to the Polish Government, the Rumanian Covernment also completely endorsed the uelling of the Hungarian rebollion by Soviet troops. The establishment of the direction committee for an "electorate bloc for all democratic and ratriotic forces" under the chairmanship of Cheorghiu-Pej, the First Secretary of the Communist Party of Rumania, shows that the Communist-controlled unity list will also be used in the forthcoming elections.

the opposition in the SLD leadership against Ulbricht initiated activition which aim to bring about the resignation of Ulbricht, Schirdevan and Matern. This opposition includes Rau, Selbmann, Oelssner and, since recently, Tornke and has Pahlem for its spiritual leader. January 1957 was mentioned as a rossible date for Ulbricht's resignation. A change of such political mognitude would of course require the consent of the Soviet Covernment. It is unlikely, however, that Moscov should consider a change of course and a top-level reshuffle op ortune at the resent moment. Ulbricht's position must not at rresent be considered weakened and the present hard course had even sharpened by the last arrests of intellectuals and economic functionaries. A speech which Tahlem sade before students of a Party indoctriantion course premed to indicate that he is propagating cortain mationalist tendencies. There is little likelyhood, however, that a national Com unist regire. even if "oscov consented, could be established in the Soviet zone of Cormany in view of the complete lack of support by the masses.

- c. The decreasing deliveries of hard coal and ore from Poland make the fulfillment of the current economic plans doubtful. Only 50 resent of the deficit can be made up by deliveries from the USSR. Production storpages already resulted in reduced working hours, shifting of -orking times to mitht shifts in light industries and eventually in unemployment and thus increase the dispatiofaction of the workers.
- d. It was again stated that a conference of the "Council for lutual Economic Aid will soom take place either in Moscov, East Merlin or Prague. The necessity of such a conference is apparent. The CDR fears that far-reachin, aid measures will have to be taken by the GDR in favor of the other Eastern Bloc countries.
- The workers conference which convened in Fast Borlin on 7 and 8 Pecerbor again urged for establishment of workers committees which were interpreted along the lines of the regime. The SID is well avere of the ricks involved in the sotting-up of any king of workers councils and is thus trying to delegate only reliable workers to these committees. In the event of primaries, there will, horever, probably be sharp conflicts between the Party and Labor Union functionaries and the vorkers. Non-partisan members were also elected to the enterprise Labor Union head warters in the FDCB elections destite wite different directives. Forkers are also increasingly demanding higher vages. Since only an insufficient volume of goods is available for increased buying to er, the Party leadership sharply rejects any such demands which are branded as "hostile concepts". The workers became aware of the strength of passive resistence because of the example of Hungary.

#### I. Political

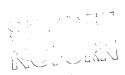

#### 1. USSR

a. (1) The expected planary session of the Contral Committee of the Communist Party of the Soviet Union is now close at hand. An insignificant folsy evidently resulted from the fact that Shepilov and Zhkov were away from Moscow for a short time. Their visit to Wardaw and the speedy completion of the agreement on the processe of Soviet troops in Poland had become necessary because of Gemulia who urgently needed aid in his struggle for popular support in Poland. The fact that the Contral Committee of the Communist Party of the Soviet Union is convening still this menth shows that the Soviets are pressed for time and that the Presidium of the Contral Committee reached a cortain measure of agreement on the measures to be taken in the mear future which are deemed necessary for the overcoming of the present erisis. The impending conferences within the framework of the Warsaw Pact and the Council for Mutual Economic Aid call for important decisions which must be discussed before the plenary session of the Central

25X1 Committee. a comprehensive agenda for this plenary Malonkov, Suslov and Minister of Financo sesoion and Sverev would also make speeches in addition to a large number of Malankov and his tendencies had 25X1 received new impetus from the recent development and 25X1 Soviets were aware that raising the living standards was of primary importance in the fight of the world cystems. oconcaic problems figured prominently among the oubjects to be discussed by the plenary session and Sverev would discuss the 1957 budget which would drop all pushed investment policies. Another supplementary information indicated that the Soviets want to procure consumer goods in the world market with the help of their gold reserves.

- the Contral Committee would try to substantiate the pronouncement dated 30 October 1956 on the rearrangement of relations in the Socialist camp. The Warsaw Pact which in the pact 25X1 had served as a useful instrument of foreign-policy but had proved unsatisfactory in military respects would have to be revised.

  Moscow now argued that Communist Internationalism would in the future be marked by its "diversity" and would be transformed, as it were, into a "competition of ideas". There would be no open outbreak of the latent conflict in the collective leadership and no sensational top-level reshuffles of personnel, since the Soviet leaders decided to make common offerts to overcome the crisio.
- b. As had already been reported, the Soviet leadership, fully awar of the crisic which resulted from their Satellite policies and which, according to recent information on unrest in the Baltic republics and particularly in Lithuania, even spilt ever into the interior of the Soviet Union, and particularly involved the youth, is dominated by a strong desire for a foreign-policy diversion offensive. The possibilities for such offensive are, however, extremely limited because of the event which has its repercussions on the policy of coexistence.

Soviet feelings in the Folish population which is pro-Hungarian by tradition. The Folish regime is consequently making every effort to prevent anti-Soviet demonstrations such as those in Stettin, stating that it was necessary to spare the Polish Nation the fate of Hungary. d. In an effort not to aggravate differences with the Soviet Union and part of its Satellites, Tito suggested that a Soviet-Yugodlav committee be set up to check on all ideological differences. The Yugoslav delegation

25X1

25X1

impressed by the negative attitude which the pro-Roscou Communist
Parties assumed toward Titoism. Another report indicated that
Belgrade is concerned about the political development because the
Yugoslav workers are discatisfied with their wages and living conditions.

#### 3. Soviet Zone of Germany

25X1 the visits Soviet-zone delegations paid in Jaroav and Prague were initiated by Moscov which tried at least outwardly to consolidate the relations of the various Rarsaw-Pact countries. Loscov had wished that Latern and Ray rather than Ulbricht be sent to Target since they were bottor suited to sattle the differences between the SCD and the Polish Communist Party. Their delegation prepared the now current economic talks on the exchange of goods in 1957 and probably also reached an agreement that party-political conflicts be not discussed in public. Ulbricht's task in Prague was less complicated. The oconomic talks went smoothely and the partners visual the events in the Satellite countries eye to eye. Fanko- as well as Prague assumed a megative attitude toward Tito and considered a possible 25X1 procrastination of the execution of the aid measures which the Yugoclaves had been promised in the cummer of 1956. In regard to the Polich situation they felt that it would be undocirable further to affront Poland, particularly since Gomelka's position was less stable than had been assumed. The fact that a Soviet zone delegation was sent to loccov is due to fears by Pankov that during forthcomin. talko on necessary changes of the universal eastern Five-Year Plan changes may be made in favor of Poland and Hun, ary. The delegation conse wontly is to try to save and have again confirmed the Soviet promise of July 1956 that the Soviet some of Cermany would be made the show-window of Socialism.

- b. By promptly executing Soviet directives concerning his policies to and Poland and Yugoslavia, Ulbricht again proved a completely reliable and subservient henchman of Hoscov, particularly since a cold var against Poland would much more be in keeping with his desire for a clear separation of vieve. Regarding Yugoslavia he was given free hand within certain limits by Shopilov. On 15 December 1956, the "Neues Deutschland" newspaper again charply attacked certain policy formulations which Tito had made in his tole speech.
- c. At the 45rd session of the NDPD Main Committon which was held in Cottbus on 26 and 27 November 1956, Bolz clearly outlined the situation with which the Soviet-zone rulers are confronted. In view of the attempts by the Party headquarters completely to disregard the recent revolutionary events and their offects on Party activities and in view of an almost rebellious attitude of those who were present at the session, he frankly stated that all other problems were of secondary importance when compared with the necessity of staying in power. He said that only the alternative of either strengthenia the position of power or falling down was left and stated that concessions or yielding could save nothing and would only encourage the op enents. Using Ulbricht's formulations on reunification he said that the CDR was not an example but a model for a reunified Germany and that savin peace rather than reunifying Germany was the question at present.

- A -

d. It is significant that by using these formulations, Bolz clearly sided with Ulbricht and evidently bolieved that the activities of Ulbricht's opponents had no chances of success. All individual measures taken in the zone also indicate that Ulbricht's fist is still strong, with students being removed from universities, and numerous arrests being made and the Protestant bishops receiving no consessions on the church question. The speech which Ulbricht made on the question of the workers committees also showed that he was not willing to give these committees real influence. The Kremlin evidently also did not yet decide to change the course in the Soviet zone of Germany where things continue to ferment. This became apparent is articles of the "Neues Dautschland" newspayer which called on the students or, written by Bredei, tried to enlist the support of the intelligentsia or, written by Earnke, addressed the workers. "Earnke's attitude toward Ulbricht remains problematical, however.

#### II. Economie

## 1. Economic measures in the Soviet Bloc

The fact that the economic capacities of most of the European Satellite countries and rarticularly those of Poland and Hungary were evercharged, will make it necessary for the Soviet Bloc to revice its plans. The production in Poland slowed down and no industrial production will probably be forthcoming in Hungary during a period of at least ceveral months. It will probably not be possible to satisfy even the most urgent demands in and outside these countries. Since raising the living standards was one of the revolutionary demands which the Soviet Union has to satisfy to a certain degree, the Soviet Union as well as the individual European Satellites are presently in a precarious situation which will probably even become worse. These oconomic difficulties also threaten to impare the political stability of the European Satellites. Increased Soviet dolivery must and can make up for the deficit of the bad crops while the most urgent demands of high quality food stuff and industrial consumer goods can on short notice only be made available by Vegtern imports. As a result of this situation it is rather definitely to be believed that revision measures similar to those of the new course in 1953 are to be expected. They will probably include the following short-term and long-term plan corrections:

- a. The Soviet Union will make available to the Satellite countries both gold and hard currency credits for the purpose of high-quality food-stuff and industrial consumer goods. The first of Soviet sales of gold for the procurement of currency had already been noticed.
- b. The Sate: lite countries will immediately stop all socialization measures and partially even denationalize trade and commerce and thus try to activate handicraft production reserves to overcome the shortage of consumer goods produced by trades.
- c. The Five-Year Plan of most of the European Satellites will be revised and will be coordinated along the lines of a new course without, however, probably affecting the production plans of bacic industry and power generation. Those plan revisions will probably be marked by a alight reduction of the production of heavy and argament industry, a light increase of the production of industrial consumer goods and a stronger pushing of agriculture. The preparation of this "New Flan" will take a period of between 6 and 9 months.

. S .

25X1

The increase in the production of the consumer goods industry can, however, scarcely take effect before a period of two years because of the difficulties resulting from the switching of labor and means of production from other industries to consumer goods industry. Temporary unemployment may also result.

- d. The Soviet Union, by making phased concessions, will try to obviate certain demands for plan revisions which are to be expected in those European Satellite countries not yet involved in the rresent difficulties.
- e. Although no indications of a "new course" have so for become ar arent in the Soviet Union, one report already indicated the possibility that similar corrections as those indicated in paragraph II. 1, c above regarding the Satellite countries will possibly also be executed there. The Soviets have so far tried to otherse undoubtedly existing protests against the low living standards by initiating financial measures such as increased wages and social welfare and price cute and by executing cut-downs on working heurs.
- 2. The presently exceedingly good armament situation of the Soviet Union and the fact that the Soviet Army, Navy and Air Force were largely resquipmed with modern weapons makes possible a breathing space in the sense of a new course.

#### III. "ilitary

- 1. The Soviet Military Situation in the Satellite Area
  - The Jaroaw Fact which had been a primarily political construction for the outmaneuverin of the West-European Union (WEU) and MATO and which had been announced and propagandized as a defense instrument against alleged "estern aggression did not change the military structure in the Eastern Bloc. The establishment of a joint high command for the armed forces of the pact countries only underscored the existence of an unrestricted Sovict high command. The disturbances in Foland and Hungary as well as the remembrance of the June 1953 rebellion in the Soviet Zone of Germany during which 19 of the 22 Soviet divisions stationed in the zono had been employed for the quelling of the uprising muct have made it ap oar imperative for the Sovieto to strengthen their troops in the Satellite countries. The Soviet forces (2 divisions) resently stationed in Poland, for example, vill not be able to secure communication lines between the Sovict Union and the Soviet Zone of Germany in the event of major disturbances or to quell an uprising in Poland. (Compare the proparations which the Soviets made during the crisis in Foland). Agreements which loscov concluded with individual Satellites as a result of the recent events (compare the new Soviet-Polish agreement on the presence of Covlet Forces in Foland) in addition to the Warsau Pact will now make it possible for the Soviets to strongthen their position in the Satel'ite area and to provide sufficient military safeguardo.
  - b. Hinto that the Soviets may withdraw their troops from the Satellite countries (excepting Foland and the Soviet Zone of Cermany) belong to Soviet disarrament tactics and must be rated accordingly. These tactics extinct to weaken the Testern defense system by offering an alleged weakening in the Soviet area. If the Soviet forces were actually withdrawn from the Satellite area and even only from part of that area, the military position of the SU would considerably be weakened particularly with

25X1

regard to installations of air defense. The Soviets continue to improve their military installations and exticularly their air bases as they had done foryears. These comprehensive military investments show that for a long time to come Mosecw is determined to keep the positions which it gained in and after the occur forld Tar.

c. Soviet Fleet Demonstrations in Connection with the Tolitical Disturbances in Poland.

Soviet Wavy movements observed during the October tonsions in Poland revealed the following: in mid-October 1956, a considerable number of Soviet nevel vessels, that is a total of 15 vessels including the three SVERDLOV cruisers stationed in the Baltie were assembled in the area west of the Bay of Danzig and kept on elert. On 19 October, the day the riots broke out, a Soviot floot demonstration in the area of Hela and the Polish coast involved three SVERDLOV cruisers, approximately 10 destroyers and 20 speed boats. A second unit consisting of 1 cruiser and 2 destroyers ran along the Polish coast toward vest during the night of 19 October and put to Svinemuende during the morning of 19 October. At about non that day another destroyer of type KOTLIN joined the unit, while a RIGA occort destroyer which had been stationed in Swinemuendo was dotached to Stattin. The three cruicers of the firstmentioned unit remained on the roads of Glingen until 23 October, and part of the other vessels stayed in Gdingen. In the evening of 25 October, all ships left this area. The Swinemucade group of vessels was on alert until 29 October, the day on which three destroyers were still bethed in the harbor. It could not definitely be determined whether or not the cruiser and another dectroyer had already put to see at that time. All thic goes to show that already prior to the outbroak of disturbances the Soviet Baltic Fleet had accembled and offectively displayed for demonstrations its "operation" units at important points along the Polish coast. The importance of Swinemuende as advance base was particularly apparent.

d. Soviet Edeort Destroyers Turned Over to Soviet Zone NYA Secotreithractte.

On 7 December 1956, two Soviet escort destroyers of the modern RIGA Class seem with black-red-goldon flag in Warmsmundo indicated that Soviet mayal vessels were turned over to the Soviet Zone Mayy. as had been ennounced none time are.
